CURIOUS ABOUT CUSTARD?

What's the Difference?

FROZEN CUSTARD

Slow churning = very little air

WHIT'S is made fresh every day and served fresh... unlike most ice cream

High quality dairy, 10% butterfat, low sugar & a small amount of pasteurized eggs

Frozen Custard has a superior rich & creamy consistency

VS

AIR

SERVING TEMPERATURE

QUALITY INGREDIENTS

CONSISTENCY IS KEY

Ice Cream

Whipping process = up to 80% air

Colder temperature dulls the tastebuds

More air and colder temps requires more sugar and fat to make up for flavor loss in Ice Cream
